

## Mission

**We provide technology that improves soil health, supports the environment and ensures good yields. We design our machines to fully meet its requirements and make farmers work easier.**

## Vision

**As a team committed to development and improvement, we are building a stable and modern organization that, through quality, planning, and collaboration with stakeholders, creates lasting value for agriculture and the environment. Our goal is to be the leader in strip-till technology in Central Europe and a company every farmer wants to partner with.**
